

# CHIA

Children's **H**ope **I**n **A**ction is a non-government organisation providing a wide range of services for disadvantaged children in central Vietnam.

Our services include:

- Disability support
- Education sponsorships
- Residential support for high school students
- Construction of toilets & houses
- Health education
- Medical support

Over the last ten years, life has improved for many people in Vietnam, but the central province of Quang Nam remains one of the poorest areas in the country. Many families here struggle to survive on less than \$3 per day.

At CHIA, we support children, their families and their communities to build better futures.

Your donation will be put to work immediately to improve the lives of disadvantaged children. Here are some of the amazing things we can do with your help.

A year's supply of stationery for one school student costs **\$25**

Vaccinating one child against rubella and hepatitis B costs **\$50**

A new bicycle that allows a child to travel to school costs **\$125**

All costs associated with a child's education can be met for one year for **\$360**

The cost of a new toilet for a family, including hygiene education and maintenance is **\$1000**

Ten community health sessions to teach 300 new mothers about infant nutrition cost **\$1500**

We can build a safe, typhoon resistant home that will protect a family of five for only **\$5000**

Please donate through our website
